

CALL FOR ABSTRACTS

5TH INTERNATIONAL CONFERENCE ON TIME PERSPECTIVES

13th – 17th July, 2020, University of Vilnius, Lithuania

The Conference

We are proud to announce the 5th International Conference on Time Perspectives in the beautiful city of Vilnius, Lithuania, from July 13 to 17, 2020. Time and time perception are central concepts for a wide range of social and natural sciences. The International Time Perspectives Conference has provided an arena for within-discipline and interdisciplinary discourse on the study of time since 2007. Prior conferences were held in Coimbra, Warsaw, Copenhagen, and Nantes. We welcome contributions from psychology and other social sciences, natural sciences, health sciences, and the humanities, including anthropology, philosophy, and political science, among others. We also aim to broaden the scope of our discussion by supporting interactions with other disciplines like, for example, the arts, urban studies, gender or literature studies, economics, design, and information technology, just to name a few.

Potential Topics of Interest

We are interested in interdisciplinary approaches to time research which might include the following areas: Our everyday experience and understanding of time; temporal practices of individuals, groups, societies and cultures; mental time travel; inter-temporal choice and decision-making; temporal cultures and socialization; neural correlates of time perception; clinical implications of subjective time; biographical work and time perspective; time management; time in business, social status and time use; work-life-balance and conflicts; career success and time orientation; considerations of future consequences; instruments and methods for the measurement of temporal constructs; rhythm and time structure; experience of flow; chronotype; reconstruction of the past; mindfulness and time; boredom and time.

Although long, this list of topics is intended to be suggestive rather than exhaustive. Contributors may choose to draw on material from a range of empirical spheres and theoretical perspectives or artistic work.

Procedure

The conference is organized as a collection of organized symposia, individual talks, poster sessions, artists' presentations, and common key note lectures.
